THE CONTOUR SERIES KIOSK

TRANSACTIONAL POWERHOUSE

The Contour kiosk lends itself beautifully to deep layered functionality commonly required in bill payment, financial, and loyalty applications within Retail, Healthcare, Banking, Utility Services, and many other sophisticated self-service markets. The clean exterior design and 19" LCD provides an intuitive customer experience and professional application presentation.

The Contour is KIOSK's most flexible and secure standard model. It features four-point pry-proof doors and multiple security locking options for tight cash security. Generous interior space affords ample room for virtually any self service component set, making this model a transactional and ROI work horse. Capabilities include full paper printing options, bill acceptors, card / bill dispensers, scanners, and credit card / pin pad payment transaction options.

The Contour features dual front-access hinged doors at the top LCD level, and at the lower component door for fast and simple service. Sliding internal trays and isolated component placement access are standard features that make for easy updates and minimal service costs.
