

*The compact footprint, versatile configurations, and 22" LCD combine to provide an ideal retail platform.*

## THE EDGE HD KIOSK

The Edge HD Kiosk was designed as a feature-rich retail showcase. The 22" landscape LCD provides a high-end display to engage customers at a glance and spotlight your self-service application.

Despite the slim profile and compact footprint, the Edge HD can house a full complement of transactional components from credit card readers and receipt printers to scanners and bill acceptors. The front hinged door panel provides quick service access to components for simple maintenance. Versatile configuration options make it an ideal platform for endless aisle, guided selling, gift registry, product location, order entry, HR, and many other profitable self-service applications.

The clean enclosure lines provide ample room for branding artwork and can accommodate interchangeable signage panels. For both functionality and design, the EDGE H.D. is an excellent choice to support an optimal self-service experience.

Reliable and tested components.
