They provide self-service payment with instant photo printing in any of the popular sizes, branded with your logo and supported nationwide with KIS on-site maintenance and 24/7 customer hot desk. The quickPIX guarantees a quick ROI, increased profits and increased customer satisfaction.

- IR Interface
- USB Port
- Digital Media Bays
- CD Read/Writer
- Motorized CD Dispenser
- Credit Card Reader
- Bill Acceptor
- Dell P4 Computer

quickPIX 2000

Input from Anything

The KIS quickPIX models feature 10 different digital input devices providing interface to almost any digital camera made today. Supporting the eight most popular storage media's along with infrared and USB ports, quickPIX is versatile and easily upgradeable to new standards as they are introduced.

Photo Editing with Scrapbook Features

Beyond just the typical redeye, brightness and cropping, quickPIX includes popular scrapbook features providing high value for customers, and additional revenue for operators. Add-ons and overlays enable users to personalize graphical borders, captions text and more.

Pay and Print, Complete Self Service

Offering both cash and credit card payment, quickPIX is a complete self-service kiosk. No need to find a clerk, or a code to print, simply swipe a credit card or insert cash. This will greatly increase your overall ROI, limit misuse and increase customer satisfaction.

High Quality Prints in Three Sizes

quickPIX can be equipped with one or two printers, delivering 8x10, 5x7, or 4x6 photos, giving your customers the best choices.

Private Labeled, Inside and Out

Your brand, your colors, your logos. Increase your corporate branding and identity as well as providing a unique customer experience.

Print at the Kiosk or Your Mini-Lab

quickPIX is a perfect front-end system for your existing mini-lab. Customers can either print instantly at the kiosks or download to your mini-lab for pick-up later.
